Jeanette Hecktor is spending a few days at her home. Congratulations, Jeanette on your recent graduation from nursing school.

Mrs. C. C. Perman (nee Neher) left to spend a few months at the home of her daughter and son-in-law at Mons, Manitoba.

An attempted fire was started in the Crown Lumber Yard on Wed. night Oct. 2nd. No damage was done. Our little town is getting a little rough.

A very pretty shower was held Sat. Oct. 5th in the Legion Hall in honor of one of our local girls Dadeen Hecktor whose marriage to Lloyd Halstead takes place on Oct. 16th. The hall was tastefully decorated in pink and white and a miniature farm was built on the table which held many beautiful gifts. The evening was spent with the usual entertainment. The bride was escorted to her place of honor at a beautifully decorated table by Shirley Hay, also at the table was the mother of the guest of honor and Mrs. Leo Halstead and Jenette Hecktor. The bride was presented with a corsage and the gifts were then opened. Darleen then thanked everyone present, and lunch was served by several hostesses and the evening closed in the usual manner.

Hospital patients this week are Terry Hunt, Melville Poole, Mrs. John Brost and Hugh M. Isaac in the Drumheller hospital and Doris Bramley and Vic Luft in the Calgary General hospital.

Jane Robedts, Lorna Steeves and Frances Kaughman were presented with their swimming trophies at Three Hills Auditorium on Thursday night.

Frances Bushby, Shirley Schacher and Shirley Hay were all weekend visitors at their homes.

Owing to the inclement weather the Home and School meeting was not able to carry on much business. The meet-

ing opened with Pres. Mrs. Grace Gieck in the chair. Mrs. Ed Ohlhauser presented Jane Roberts with the cup for the highest standing and marks in Grade 9. Also Wayne Dresser with the I.O.D.E. Scholarship of \$25.00 for highest marks in Grade 12. Congratulations to you both. The evening closed in the usual manner and lunch was then served.

Little Judy Trepanier has returned home from the Drumheller hospital where she was quite ill for a few days.

CARBON LITTLE LEAGUE BASEBALL

All good things come to an end, and our Carbon White Sox finished it up with a bang. Rosedale invaded Carbon for a doubleheader wanting revenge for Carbon winning the tournament but little Flip Woods had different ideas and pitched a neat game for five innings, then he said (Stub-I think my arm is getting rusty). His brother Chewy came in and erased any thought of a win for Rosedale. The big bats for Carbon were Buddy Goacher with two homers and two singles and Chewy Woods with three singles in the first game to give nine-year-old Flip a big 11-5 win. We will see more of this next year, eh Flip. In the second game old faithful Swede Hanson came through again with 15 strikeouts to give his club a 7-5 win. Chewy Woods again slapped the ball at a rugged clip, three for three and Midge Esau decided

to get back up to the top of the batting order with a single and a four bagger.

Well fans, again we wish to thank you for your support. See you again next year with some more real ball. Thanks Stubby for your commentary on these ball games this season.

Alvin Harsch, son of Mr. and Mrs. Chris Harsch of Carbon is one of approximately 100 students working on preparations for the 35th annual Tepee Days homecoming celebration

A GROUP OF PUBLISHERS from Canada and abroad chat with the Hon. R. Reiersen, Minister of Trade and Industry, at the annual convention of the Canadian Weekly Newspaper Association held this year at Banff, Alberta. From left to right, they are W. Eric Dunning, of the Haney, B. C., Gazette; Leslie E. Barber, C.W.N.A. president of the Chilliwack, B.C., Progress; Hon. Mr. Reiersen, Tom Ford, of the Lacombe, Alberta Globe, and Mr. D. W. Comer of the United Kingdom Newspaper Society.

Funny and Otherwise

"Modern gadgets are wonderful," said the optimist. "We used to have to pull the burned toast out of the toaster; now it pops out by itself."

First Farmer: I've got a freak on my place—a two-legged calf.

Second Farmer: Yeah, he came over to call on my daughter last night.

The two men were discussing family matters.

First—Your wife used to be terribly nervous. Now she's as cool and composed as a cucumber. What cured her?

Second—The doctor did. He told her that her kind of nervousness was natural because of advancing age.

Junior: "Say, Grandpa, make a noise like a frog."

Grandpa: "What on earth for, Junior?"

Junior: "Well, Dad says that when you croak we'll get \$5,000."

Easy cable-stitch

7237

by Alice Brooks

Luxurious-looking, yet easy and inexpensive! Knit this cable-stitch rug for bedroom; play-room; or make a bathroom set with matching seat-cover.

Use rug cotton or old stockings—quickly knit! Pattern 7237 has directions for rug and seat cover. Send thirty-five cents in coins for this pattern (stamps cannot be accepted). Print plainly Name, Address, Pattern Number.

Send order to:

Household Arts Department,

A bonus for our readers: two FREE patterns, printed in our new Alice Brooks Needlecraft Book for 1957! Plus a variety of designs to order—crochet, knitting, embroidery, huck weaving, toys, dolls, others. Send 25 cents for your copy of this needlecraft book—now!

HONORARY LIFE MEMBERSHIP in the Canadian Weekly Newspaper Association was presented John Vopni, owner of the Davidson (Sask.) Leader and manager of the Prairie Publishers Ltd. at Regina, at the Canadian Weekly Newspaper association convention this year. The meeting, attended by more than 500, was held at Banff, Alberta.

Town council will institute own plan for low cost residential development

Mr. Peter Louter was present, at Monday night's council meeting and submitted, for the approval of that body, a set of plans which he had had drawn up by a firm of engineering consultants. The plans provided for further subdivision of property, for residential purposes, on Mr. Louter's land north of No. 7 Highway.

After examination of the plans, some discussion and some questioning of Mr. Louter, the latter was advised that the lack of an access street paralleling No. 30 Highway and the extreme length of the block of lots were regarded as undesirable features. He was further advised that the council would prefer to seek the advice of the Community Planning Director before giving a decision on the plans. Mr. Louter said he intended to interview the director himself and would go to Regina for that purpose before the end of the week.

The matter was discussed at some length following Mr. Louter's departure and it was decided that, regardless of the merits or demerits of Mr. Louter's plan of subdivision, it was undesirable to permit further development north of No. 7 Highway at this time. It was generally agreed that the town should, recognize the need for a low cost housing development and initiate such a scheme as soon as possible. Two motions were passed, one recording the

decision not to permit development north of No. 7 and the other authorizing the opening up of a low cost area on the west side of town.—The Clarion—Sept. 5, 1957.

Council to rush paving program

Morden Town Council, at their regular meeting Monday night, decided to speed up the 1957 road paving program to ensure completion of all planned projects before the cold weather arrives.

It was felt that the mixing of the gravel and oil was proceeding too slowly and various methods for speeding up production were discussed. A decision was finally made to put two shifts of workers on the job and to have the machinery operating 12 hours a day instead of the present eight hours. A suggestion to have one shift work longer hours proved unacceptable as it was reported that the odor prevented men from working at the job for longer periods of time.

The mayor expressed some concern that the program that had been originally planned might require more money than had been provided for in the budget. He was assured however, that enough money would be found and Councilors from the west ward insisted that 10th street be included in this year's program.—The Times, Morden, Man.—August 28, 1957.

Civil Defence Day points to need for public co-operation

J. O. Probe, Civil Defence coordinator for Saskatchewan, explained the purpose of National Civil Defence Day and the need for public co-operation and support.

"Every Canadian community—the biggest and the smallest—has a part to play in Canada's Civil Defence program. If it doesn't

play that part, the community one day might suddenly die.

The prospect of a nuclear war must be faced. And because it must be, Friday, October 4, has been designated as Civil Defence day nationwide to remind Canadians of this necessity.

The target city can save its inhabitants only by complete dispersal. But the evacuees must have a place to disperse to. That's where the rest of the country comes in—as reception centres, except in remote cases.

The first evacuees would arrive over a period of six hours. They would be billeted on the basis of one for each member of a household in the reception area.

The rest of the evacuees would arrive later, over a shorter period, to be billeted at first on a five-to-one basis. Whether a community received the first evacuees would depend on its distance from a target area. The last evacuees would have to be put up by the communities nearest the target area. They wouldn't have time to go farther.

A reception-area could expect about two hours warning that a flood of evacuees was coming. Obviously, it would be too late to prepare to accommodate them once the bombs were falling. To lay out the necessary plans in advance is the purpose of Civil Defence.

It is the government's job—the federal, provincial and municipal governments—to get a Civil Defence plan started appropriate to the area its responsibility covers.

But from that point on, all government effort is a waste of public funds and effort without the essential support of its citizens."

This GLAZED WALNUT COFFEE CAKE makes a sweet snack!

Melt in 8" square cake pan
2 tbsp. butter or margarine
and use to brush sides of pan.
Combine and sprinkle in bottom of pan
1/4 c. chopped walnuts
3 tbsps. brown sugar
1/4 tsp. ground cinnamon

Sift together once, then return to sifter

1 1/2 c. once-sifted pastry flour
or 1 1/2 c. once-sifted all-purpose flour
2 tbsps. Magic Baking Powder
1/2 tsp. baking soda
1/2 tsp. salt

Cream

1/4 c. shortening
Gradually blend in
1/2 c. lightly-packed brown sugar
1/4 c. fine granulated sugar

Add, one at a time, beating well after each addition

2 eggs
Combine
3/4 c. milk
1/2 tsp. vanilla
Sift dry ingredients into creamed mixture alternately with milk, combining after each addition. Carefully spread batter in prepared pan. Bake in moderate oven, 350°, about 35 mins. Stand baked coffee cake, in its pan, on cake rack for 10 mins; turn out and serve warm with butter or margarine. Yield: 1 coffee cake.

Magic protects your fine ingredients, gives you lighter, fluffier baked goods. Get Magic Baking Powder soon!

Courtesy and consideration on the highway

By ARTHUR S. JOHNSON
Vice-President — Engineering
American Mutual Liability
Insurance Company

The automobile and all that its use implies can become one of our most civilizing material influences. But the glaring facts remain — as a nation of drivers we have much to improve in our feelings and attitudes toward our fellow travelers on the highway.

As a safety engineer dealing with the problems of highway safety, I say that the automobile will be operated with decency and courtesy and common understanding as soon as the spiritual potential in our American way of living becomes understood and knowledge of it widely known and distributed. That means learning the moral principle that underlies courtesy. We who work in the safety movement have an unparalleled opportunity to study moral

principle. In it, one is not dealing with villainy or viciousness, but merely simple ignorance and lack of skill in the use of new tools.

It is in the safety movement that men study accidents caused by simple human failures, and teach safe practices in the practical school of human relations. Perhaps the simple techniques of courtesy should comprise this chapter also. I have chosen, however, to deal with courtesy as synonymous with the moral principle which should control the behavior of motorists toward each other.

The principles which define civilization are charity, compassion, and tolerance. If the automobile is to serve as the greatest single factor in the creation of wealth and its distribution, to be used as a material force for good, it must help to reach the realization of these civilizing principles. It does

Give the other fellow a break. Be courteous!

Teamwork plus Courtesy helps to get you there safely.

Common understanding among drivers will produce decency and courtesy.

Closing of rural schools adds to northern enrollment

School bells rang again in Meadow Lake last week as 275 high school students and 834 elementary started back to a new school term. School enrollment here shot up rapidly to accommodate the students from 14 country schools which have closed their doors in the past year, and now come by school bus to Meadow Lake. Some 20 percent of this town's school population comes to school by bus each day.

Record school enrollment already back in classrooms is expected to go even higher. High school authorities expect another 26 students to enrol in the next few weeks.

The 834 students in the three elementary schools are broken down in the following manner: Martin Gran, 273; Westview, 223; and Lakeview, 338. — The News-Optimist, North Battleford, Sask. — September 4, 1957.

and it will—give it time, patience, and the driving energy of teaching.

The screaming, swearing, impatient ejaculation aimed at the passing motorist or pedestrian for an action that one does not like, merely because it makes one change his own path or speed, is the antithesis of charity. As a matter of fact it is an expression of hate. It is an act of pointless savagery that could, otherwise have been a much simpler act of courtesy. There is more to charity than laissez-faire, for it connotes love; at the least good will and liberality.

When the driver acquires sufficient skill and ability not to be afraid, so that his car responds deftly to his will and reflexes, he can then learn to let it teach him charity. Most drivers encountered today are mature, skilled and courteous; many still need to learn.

Let's talk about the man so heedless of others that he operates ruthlessly, in utter disregard of the effect that has upon his neighbors on the road. Such a ruthless wretch (speeders included) needs to be barred from the road temporarily, even as the anti-social and the felon need to be denied freedom temporarily. Such behavior is the antithesis of compassion. Compassion for the other driver is not doctrinaire, but is very practical attitude that marks the civilized man.

I have put charity and compassion in the spotlight of human behavior as it applies to the man behind the wheel. But the quality which comes into play constantly

DEAD-EYE DICK FROM SASKATCHEWAN — Ronald Rosher, who recently won the North American junior trapshooting championship at the Grand American trapshooting tournament at Vandalia, Ohio. Rosher, 16-year-old son of Dr. Frank Rosher of Saskatoon, topped the title by scoring a total of 197 out of a possible 200. The youngster, who has been shooting four years, outshot a field of 25 teenagers from the United States.

in every driving situation, and allows for the slightest as well as the greatest difference between us as individuals, is tolerance. It makes one allow for the behavior of another in manners different from one's own. To the engineer tolerance is the acceptance of something at variance with a measured standard. Driving can never be measured to an exact standard. There will always be the necessity to accept variation in some degree. Only those things which are spelled out in the statutes permit of no tolerance. Tolerance is freedom of choice rightly used.

All three of these qualities, of which courtesy is the common gauge, are unenforceable. They come into proper use and understanding through acts of self-discipline. Recognizing them and learning them, and heeding them, will help to make the automobile the civilizing force that it can become.

FRAGRANCE

Put fragrance in your linen and lingerie drawers by storing perfumed toilet soap among articles, first removing the wrappers.

"The screaming, swearing, impatient ejaculation aimed at the passing motorist."

"The man so heedless of others that he operates ruthlessly."

Saskatchewan Game Act rules changed

There are a total of 22 changes in the regulations affecting hunting in Saskatchewan this year. New amendments to the Game Act make it compulsory for parents or older adults to directly supervise hunting expeditions of youngsters.

Other changes in the regulations include:

Hunters in the field during the big game season must have a big game licence.

The use of full-metal-jacketed hard-point bullets and bullets that have been altered or tampered with is prohibited.

A new section of the Game Act prohibits persons from hunting while intoxicated or under the influence of a narcotic drug or while their ability to hunt is impaired by alcohol or a drug.

Hunters will no longer be able to chase game with a boat or automobile.

Aircraft may not be used to spot game and then report to hunting parties on the ground.

Regulations regarding the size of portions of big game that may be transported and exported have been changed. Now it will be possible for hunters to cut up big game in order to facilitate transportation.

Conservation officers now have the protection due a constable as well as the powers of that office.

The final amendment makes it mandatory for those guiding or accompanying big game hunters to dress in the same manner as the hunter himself.—The Watson Witness, Watson, Sask.—September 5, 1957.

Argentina stores grain underground

A new type of underground grain storages with a total capacity of over 6 million bushels of wheat was opened in Argentina, on June 22, reports W. F. Hillhouse, Agricultural Secretary, Buenos Aires, in Agriculture Abroad. They were built at Villa Constitucion on the Parana river in the province of Santa Fe, as part of the program to increase Argentina's grain storage capacity.

The storages are in two groups of four long trench-type silos made entirely of concrete. Each silo is divided into 10 or 11 individual bins each of which has an opening in the convex roof which can be hermetically sealed. Loading and unloading is done by portable electrically operated machinery. Only the roof of each silo is above ground level. Once this type of storage is sealed, the oxygen is soon exhausted and it is claimed insect pests die and the grain does not lose condition.

Argentina began experimenting with underground grain silos in 1941. The first silos were merely holes dug in the ground, fire baked to harden the walls, and covered with straw and earth after being filled. These were followed by trench type silos lined with an earth cement mixture and covered with straw earth and waterproof paper. The President of the National Grain Board stated that approximately 25 million bushels of grain has been stored in the trench-type silos and had shown a loss of only one-half percent by weight after two and one-half years. The design has been further improved by research resulting in the type of silo constructed this year.

Brother and sister meet after 37 years

Mrs. Charles Stirling had as recent guests her sister, Mrs. Valley of Moose Jaw, and a brother, Mr. Wm. Black of San Diego, California. It was 37 years since brother and sister had seen one another so it was a very special reunion.

Mrs. Stirling is also expecting another sister, Mrs. Cunningham of Chicago, to arrive in a week or so. Mrs. Cunningham plans on staying in High River for a time.

Mr. Stirling has recently returned from Vancouver where he visited relatives for three weeks.

—The Times, High River, Alta.—September 5, 1957.

Canadian Weekly Features

Canadian statistics report

(A Weekly Review)

International Trade: Canada's current deficit on transactions in goods and services with other countries rose to a record \$507,000,000 in the second quarter this year compared to \$435,000,000 last year, bringing the half-year total to \$914,000,000 as against \$798,000,000 in 1956. Less than a third of the second quarter increase was due to merchandise trade. Net inflow of capital in long-term forms reached \$469,000,000; in first quarter was \$326,000,000. During 1956 the net capital inflow into Canada amounted to \$1,372,000,000, and the year saw non-resident long-term investment in Canada rise to \$15,400,000,000 from \$13,468,000,000 at the end of 1955.

Housing: New dwelling units completed in the first seven months this year totalled 59,145, down from 67,675 last year, while the number started fell to 61,496 from 76,131. At the end of July the number under construction was almost 18 percent below a year earlier at 70,964 units.

Motion Pictures: Production of television commercials in Canada rose in 1956 to 2,153 from 1,334 the previous year and newsreel stories for television to 562 from 385.

University Salaries: Salaries of teachers in Canadian universities and colleges averaged \$5,775 in the 1956-57 session, the average ranging from \$5,982 in the western provinces, \$5,934 in Ontario and \$5,669 in Quebec, to \$4,827 in the Atlantic Provinces.

Merchandising: Aggregate sales of chain stores in 11 trades were nearly 11 percent higher in July this year than last, grocery and combination stores as usual leading in dollar size of gain. Department store sales in the month were also nearly 7 percent higher.

Manufacturing: Manufacturers' shipments in July were valued at \$1,815,447,000, about 3 percent higher than a year ago; cumulative value of shipments for the first seven months at \$12,559,416,000 showed a slightly higher rate of increase. Value of inventory owned by manufacturers declined fractionally in July from June to \$4,267,776,000, at which level it was over 8 percent above last year's July value.

Cat has Siamese quadruplets

Mrs. Archie Hogg has a cat which has produced four kittens, all bound together Siamese style, and all living. There were two normal kittens in the litter, and then the four Siamese freaks. They are joined to each other round the navel, but one kitten seems to have one foot bound up in the body of another. When you pick up one kitten, you pick up the whole quartet. All are pure white.

This freak birth is said to be a very rare occurrence and some of the pet shops have never heard of its happening before. Mrs. Hogg has brought the Siamese quadruplets in to Dr. Archie Bishop who is interested in studying them. How long he will be able to keep them living is a question. What a peculiar adult life they will lead if they do grow up. Bad enough to be a Siamese twin, but to have only one-quarter control over a joint body would be very confusing.—The Times, High River, Alta.—August 29, 1957.

Canada's Minerals A Bridge to Prosperity

During September and October the doors of Canada's mineral industry will be opened to delegates from 30 countries attending the 6th Commonwealth Mining and Metallurgical Congress. Here they will see the great development which has taken place since the Congress

last met in 1927. In the interim, the Canadian mineral industry has grown beyond all expectations. In 1956 the value of Canada's mineral production soared over the two billion mark.

The Canadian miner, labouring in the depths of a metal or coal mine creates employment not only for many of the 133,000 persons directly connected with the industry but for numerous other Canadians in allied industries.

Aviation is an important link in the extension of the mineral industry to the almost inaccessible corners of Canada's 3.8 million square miles.

National Film Board of Canada Photos.

A pipeline system, which covers over 18,000 miles of Canada carries oil and natural gas to thousands of Canadian industries and homes. The completion of the Trans-Canada and Westcoast Transmission pipelines will bring

natural gas to six provinces and every major centre between Vancouver and Montreal. Hand in hand with pipeline development goes the continued buildup of gas and oil reserves.

BE ACTIVE

One H-bomb dropped on each of Canada's eight major cities could wipe out a quarter of all Canadians—unless an active Civil Defence program is in effect.

Chic side line PRINTED PATTERN

4556
SIZES
12-20: 40

by Anne Adams

Paris inspired the stand-away collar; chic side-button line of this lovely dress! You can sew it quickly, with a Printed Pattern! Neat step-in, 3 sleeve versions smart for any season!

Use a shotgun

(The Record, Reston, Man.)

With the hunting season underway it might be well to reflect that every year a toll is taken not only of the hunted but also of the hunter. While there may be some justice in this situation, there are some who feel that the toll of hunters should be reduced and if certain basic rules are followed it will be reduced.

Guns are dangerous weapons, be they a b-b or an elephant rifle, and one of the most basic of the basic rules is that they should never be pointed, where, if they discharge damage will result.

Another basic rule is to treat all guns as if they are loaded. Many a hunter has found to his sorrow that the supposedly empty gun was just the opposite.

It is also well when in the field to see that the line of fire is clear. A surprisingly large number of people object to picking pellets out of their hide, and farmers become quite irate when they find a favorite animal dead.

Another excellent idea is not to carry a loaded gun in a vehicle. Not only do the authorities frown on the practice but it is an expensive proposition to repair a hole in the upholstery or body of a car or human.

It has been found to that it is a pretty good idea for the hunter to remain unloaded. Alcohol has been found to be a very poor mixer with guns. While empty bottles make excellent targets, it is safer if the empties are provided by another party of hunters, who have hunted the previous day.

Another piece of advice to hunters, if you must shoot yourself, use a shotgun, statistics prove that shotgun wounds produce more fatalities than rifle wounds.

★ ★ ★

Do they support your town?

(The Plaindealer, Souris, Man.)

Some comment has been noted recently in respect to the number of trucks, with consumer goods, to be seen on the streets of Souris. Doubtless these same trucks are visiting other towns which constitute local business and are sharing in the support of the community through the usual channels of taxes and payroll, as well as through the proprietor's position as a citizen of the town and community he serves.

We haven't any idea of the volume of business transacted by the peddler trucks. But whether it is small or large, they are in direct competition with local manufacturers and should, therefore, contribute, either by license or business tax, to the corporation in which they operate. This applies to a number of instances where outside companies are competing directly with local firms, but do so without any cost in relation to support of the town. In several cases, the outsider only operates as long as there is any cream to be skimmed off. The local man operates day by day, irrespective of conditions. He is conscientiously doing a grand job of serving the community at large.

In towns and villages not served by local industry, the truck service, delivering direct to a local distributor, is undoubtedly worthwhile, but when the competition is head-on with a similar product of local manufacture, it is unfair provided a local license or a business tax is not imposed.

This is the attitude taken by the civic governments in several Manitoba communities, and it is a practice rigidly enforced in many towns in North Dakota.

As a citizen, or as a business man, you may save a few cents, now and then, through pedler patronage—but when you give the peddler your money, you are taking away support of the man who helps pay a share of that sidewalk extension near your home—or helps pay for your police and fire protection. Perhaps he writes the pay cheque for a member of your family.

The peddler doesn't give a hoot about your home town. But he might consider it in a different light if a substantial cash on the barrel head license was an essential before he started doing business in your community.

Ninety-nine

(The Advance, Renfrew, Ont.)

Renfrew will celebrate 99 years of incorporation this weekend with many events scheduled for "Pioneer Days" on Friday and Saturday.

Although the main event—the centenary—is coming up next year, the 99th anniversary would be hard to bypass without some recognition, and a Pioneer Days committee have worked hard to make this weekend a success.

Advertisements in this issue of The Advance list the program of events for young people and adults and merchants are co-operating with store promotions for shoppers.

This town won't go on a rampage like the Mardi Gras in New Orleans or a fiesta in Spain but in preparation for the 100th anniversary next year no one should overlook the chance for some entertainment on Friday and Saturday.

Canada's needs come first

(The Empire Advance, Virden, Man.)

Despite the fact that construction is underway on part of its line, in some matters Trans-Canada Pipelines Limited seems to be dealing in contingencies rather than actualities. This applies particularly to the company's gas supplies, its contracts with Canadian customers and its contract to export gas at Emerson, Manitoba, to Tennessee Gas Transmission, the American company that has minority but nevertheless actual control of the Canadian pipeline.

Trans-Canada has permission of the Alberta government to take out of the province a maximum of 620,000,000 cubic feet of gas per day. But by its own published record the company will need 793,000,000 cubic feet of gas to meet its maximum daily requirements. Included in this latter figure is the quantity of 204,000,000 cubic feet per day that Trans-Canada has contracted to export to the Tennessee company. Not included in the statement of the Canadian pipeline company's needs are quantities that will be needed for Canadian municipalities, that the company expects to be customers but that have not as yet signed contracts.

There is also the fact that while Trans-Canada's sales contracts extend for a period of 27 years, its purchase contracts with Alberta gas wells extend for an estimated period of 14 years, at which time these particular wells are expected to be exhausted.

It may be presumed that Trans-Canada intends to, and expects to be able to, buy additional supplies and obtain Alberta permission to take the gas out of the province. However, before the Canadian government issues a permit to allow Trans-Canada to export one foot of gas to its affiliated American company, Tennessee Gas Transmission, Ottawa should insist, (a) that proved reserves in western Canada are sufficient to meet future Canadian requirements, and, (b) that Trans-Canada has purchased sufficient quantities to meet the needs of Canadian customers in those areas in which it has been given a monopoly.

Street maintenance

(The Weekly News, Mossbank, Sask.)

Mossbank street maintenance man lost no time after the rain to get on the streets with the tractor and small scraper. This prompt action prevented those little pot-holes forming and smoothed out the main street in fine style. This, it would seem, is the answer to keeping Mossbank's streets in good condition. By this, we mean, get the scraping or dragging done before the streets harden too much after a rain. In other words, a little dragging at the right time, does a very creditable job on the streets, and it avoids suffering that rough, pitted condition, which in the past has often had to wait for the coming of the patrol, when it becomes available.

It is unreasonable to think that the municipal council can rush one patrol from any road job it is doing, to drag the Mossbank streets after every shower; but on the other hand, should the citizens and visitors be subjected to a rough main street, every time, until the patrol becomes available?

We very much concur in the recent action of the town council in using its own equipment and maintenance man, in getting at the job of scraping our streets at the right time and getting a very creditable job done. With such continued prompt attention to the maintenance of our streets, particularly main street, it is reasonable to expect that once again we can be proud of Mossbank streets. We doubt if there are many towns of similar size, which have even the back alleys, as well as the main streets and avenues gravelled. The old adage "A stitch in time saves nine", seems to apply as much today, as it did generations ago.

About teachers

(The Mercury, Estevan, Sask.)

Inadequate salaries of teachers are frequently blamed for the appalling ignorance and, indeed, the illiteracy, of many students just entering college.

Another and more convincing explanation, however, is that the quality of teaching in Canadian schools is suffering because the pedagogical dog-tags required of those entering the teaching profession by educational officialdom, and acquired only after much weary attendance at teachers' colleges and summer school tabloid courses in educational methods have little appeal for the brilliant and imaginative mind.

It would be tragedy if doctrinaire educators with bureaucratic minds, and teachers' federations, should turn the teaching profession in Canada into a "closed shop", from which the brilliant and imaginative were excluded, and in which mediocrity capped with a Ph.D. (education) was the sole hallmark of success. It is not beyond the realm of possibility that this is what is wrong with Canadian schools.

The Weeklies say

(The Record, Rimbey, Alberta, September 11, 1957)

THINGS HISTORICAL

Having seen the many objects of local historical interest exhibited at the opening of the Stanstead museum, we wonder what became of all the household items of a century or more ago. No doubt many relics of the past are tucked away in attics and sheds, most of them not recognized for what they are.

—Stanstead, Que., Journal.

DUST IS REAL

There is an old saying "watch our dust" implying a fast get-away, speedy action, and display of superiority in the ability to go places quickly. One felt a bit proud to throw out a boast like that . . . When we say "watch our dust", it is no empty simile. The dust is real.

—Estevan, Sask., Mercury.

WORLD GOES ON

The cries of concern over "the present generation", have been raised in the same heartfelt tones for a good many decades . . . and yet the world goes on, with each succeeding generation benefitting more and more from the discoveries made by men who, two or three generations before, were part of a mass of young people.

—Grande Prairie Herald-Tribune.

TRAINED GIRLS

Better it would be if more of our young girls were trained in the shops and institutions of our country . . . so they could make a contribution to the operation of society and help to effect a return of married women to the home.

—Duncan, B.C., Cowichan Leader.

DENTIST SHORTAGE

British Columbia is suffering from an increasingly acute shortage of dentists. The only solution is the establishment of a faculty of dentistry at the University of British Columbia capable of graduating at least 40 dentists every year.

—Terrace, B.C., Herald.

PHILOSOPHIC SIDE

If you dread old age, remember that many millions will never have the privilege of experiencing it. — Peace River Block News, Dawson Creek, B.C.

TOURING PROVINCE—On a tour of the province via Saskatchewan Transportation Company bus, 17 Saskatchewan residents pose for the cameraman in Prince Albert.

VISIT WILDLIFE EXHIBIT—Saskatchewan residents on a harvest tour of the province visited the Lund Wildlife exhibit at Prince Albert, among other attractions.

Province's attractions surprise touring residents

What do Saskatchewan people think of Saskatchewan?

This question was posed to 17 men and women from southern Saskatchewan visiting Prince Albert, while on a Saskatchewan Transportation Company-organized tour of the province.

Most of the men were farmers. Naturally, they were mainly interested in the different types of farming country seen along the way.

The womenfolk were interested in the scenery more from an aesthetic standpoint — watching the unbroken prairie between Regina and Saskatoon change to rolling, tree-dotted parkland as they neared Prince Albert.

The four-day, "harvest time" tour originated from Regina, September 9 and took in Saskatoon, Prince Albert, Melfort, Tisdale, Yorkton and Fort Qu'Appelle, returning to Regina, September 12.

Ralph Reilly, STC sales manager, said the crown corporation will sponsor sight-seeing tours annually "to help Saskatchewan people get to know their own province better."

Those interviewed said they were amazed at the variety of scenery as they moved through the province. Most had never been north of Saskatoon.

Mrs. S. Day, Craven, said that she and her husband usually went to Banff. "We like the scenery there, but we never dreamed there was so much different scenery to see right here in Saskatchewan. This tour is really an eye-opener."

J. Lancaster, Moose Jaw, liked the "magnificent stonework" of Saskatoon's university buildings.

W. Beaver, Moose Jaw, thought the Western Development Museum in Saskatoon was "really worthwhile seeing. I could have spent a whole day there."

The pine and spruce forest bordering Prince Albert and Lund's Wildlife Exhibit particularly caught the eye of A. McCord, Penzance.

H. Binner, Moose Jaw, liked Prince Albert's "quaint and impressive buildings" and especially enjoyed looking over Prime Minister John Diefenbaker's residence. All were impressed with the lo-

cation of Prince Albert's Sanatorium in a shelter of pine and spruce, overlooking the North Saskatchewan River, just north-east of the City.

"What an ideal place for patients to recuperate," commented Mrs. E. Smith, Regina. "The air is so clean and fresh up there."

For L. Jolly, Craven, a high-point of the tour was seeing horses again. "We saw a four-horse outfit working near Wakaw. It brought back memories of the days when I worked with horses. You know, we never see them down on the prairie anymore."

School for retarded children opens here

Killarney is the sixth community in the province to take steps toward the education of retarded children, with the opening of such a class here Tuesday morning. Other classes for trainables are located in Winnipeg, Steinbach, Morden, Selkirk and Flin Flon.

The local class is being sponsored by the local branch of the Association for Retarded Children with Mrs. T. E. Smith of Ninga as the teacher. Six boys and one girl comprise the attendance at this class which has as its main objective that of stabilizing and socializing the youngsters.

Mrs. Smith has been well trained for this class of work, having taught slow learners in Winnipeg, studied religious psychology at Emmanuel College in Toronto and has recently attended summer school at Manitoba University, where she attended classes sponsored by the Extension Service on Adult Education.

Assisting her until the youngsters become adjusted to their new surroundings and their training are mothers of the children who are taking turns each morning.—The Guide, Killarney, Man.—September 5, 1957.

CAN SAVE LIVES

In peacetime disasters, as in the disaster of war, Civil Defence can save lives and reduce property damage.

To study industry in Pakistan

Representing Canada on a team of dairy experts including representatives from Australia, The Netherlands, Denmark and the United States, D. B. Goodwillie, Dairy Products Division, Department of Agriculture, Ottawa, plans to leave by air for Pakistan the latter part of September.

The purpose of the team's visit to Pakistan, arranged under the F.A.O. at the request of the Pakistan government, is to prepare a detailed improvement program in consultation with the Pakistan authorities, for development of the dairy industry in the cities of Karachi and Lahore.

At the request of the F.A.O. the team of dairy experts will provide that body with estimates of the total costs of separate programs for each of the two cities. These will be divided into local costs, external costs, and technical assistance, and suggest the amount and type of local and external finance needed in each phase of the development programs. The team is asked to suggest legislative, administrative and educational action that should be taken by the Government of Pakistan and local authorities to ensure an effective and permanent Central Milk Authority and what part international co-operative action and assistance might play in the development of dairy plants that can be operated on a technically and economically sound commercial basis.

Mr. Goodwillie expects to be gone four to six weeks on this mission.

Work proceeds on power plant

Work on Canadian Utilities million-dollar power plant south of Valleyview is "progressing well" and it is expected to open some time in November, District Superintendent E. Harrison said.

He said that work on installation of the Swiss-built gas turbine was well underway.

The new plant, which will be fed by a gas well about a mile away, will produce the basic power load for the company's entire northern system upon completion.—The Herald Tribune, Grande Prairie, Alta.—August 27, 1957.

Report shows "tough" year for farmers

An estimated one-third to one-half of the crop in the Yorkton district has been harvested and a further 10 days of good weather is required to complete operations, Walter Boucher, agricultural representative, said.

The weather has not been conducive to good harvesting and in some districts the grain is sprouting, especially where the swaths are light and beaten into the ground.

Mr. Boucher said the crop immediately around Yorkton is extremely light and it is doubtful if the yield in the whole area will average 15 bushels an acre. The majority of the wheat will grade No. 3 and a good portion of it No. 4.

He said hail had taken out big chunks of the better crop in the Spy Hill, Esterhazy and Theodore districts. The best crops of wheat are to be found on good summer-fallow. Barley and oat yields are very light.

Mr. Boucher said farmers would be well advised to keep a close watch on their stored grain for infestation by mites and beetles.

The best of the hay this season, he said, is none too good due to the poor curing conditions.

Summing up the overall picture, Mr. Boucher remarked that "in general it is an extremely tough year for the farmers."—The Enterprise, Yorkton, Sask.—September 12, 1957.

New superintendent for Mobil Oil Ltd.

Allan A. MacCalder has been named district production superintendent for Mobil Oil of Canada, Ltd., in Swift Current. He replaces W. T. Archbold, who is moving to Weyburn.

Mr. MacCalder is a graduate petroleum engineer from the University of Alberta. Following several years of experience in western Canadian oil fields, he joined Mobil Oil of Canada in 1953 as a production foreman. He is married and is a resident of the city.—The Sun, Swift Current, Sask.—September 5, 1957.

Half-size style PRINTED PATTERN

by Anne Adams

Wonderful to sew and wear! This lovely dress takes less than a day to make—with our Printed Pattern! Cool, slimming—designed to fit shorter, fuller figures perfectly!

Printed Pattern 4724: Half Sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ requires 3½ yards 35-inch fabric.

Printed directions on each pattern part. Easier, accurate.

Send fifty cents (50c) in coins (stamps cannot be accepted) for this pattern. Please print plainly Size, Name, Address, Style Number. Send to:

Anne Adams Pattern Dept., Department P.P.L., 60 Front Street, W., Toronto

BEET CROP LOOKS GOOD

The rain which drenched South-east on Tuesday, bringing harvesting operations to a temporary halt, left at least one segment of the farm population, the beet growers, in an optimistic frame of mind.

"It was just what we needed," said K. T. Kroeker, representative of the Manitoba Sugar Beet Company. "It looks very favorable, and it wouldn't be too much to say that we stand a good chance of getting a bumper crop."

The Manitoba Sugar Beet Co. supplied about 85 percent of all the sugar consumed in Manitoba last year.

IN THE HOME WORKSHOP

Unusual wall shelf

A stairway to the stars makes an unusual wall shelf for plants and small objects. A different version may be used for a wall decoration for a child's room and pegs added to it offer encouragement for hanging up clothing. Phosphorescent paint makes the stars

actually shine in the dark. The 18-inch moon is easy to cut from one-quarter inch stock with a compass saw. The stars and stairs are straight cuts. The little figures may be traced from the pattern and cut out with a fret saw or it may be cut roughly and then be smoothed up with a pocket knife. Pattern 398 includes painting directions to get a life-like effect for the figure. Price of the pattern is 35c.

Unit shelves

Unit shelves and desk may be arranged in different ways to fit your space. More shelves may be made as needed. Pattern 270 for

the shelf and rounded end sections, 271 for the corner unit, 272 for the desk, give actual-size cutting guides where needed and illustrated construction steps. These patterns are 35c each. Add 10c service charge to your order.

Send orders to:

Vancouver, B.C.

Stubborn Skin Itch

Stop Scratching! Try This Tonight For Quick Ease and Comfort

To find relief from the tormenting miserable itching, try stainless, greaseless, MOONE'S EMERALD OIL. You get prompt relief from the itch of most externally caused skin and scalp irritations. EMERALD OIL is sold at all drug stores.

BACKACHE May be Warning

Backache is often caused by lazy kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest or that tired-out and heavy-headed feeling may soon follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Get Dodd's Kidney Pills now. 81

YOU CAN SLEEP TO-NIGHT

AND RELIEVE NERVOUSNESS ALL DAY TO-MORROW!

SEDICIN tablets taken according to directions is a safe way to induce sleep or quiet the nerves when tense.

SEDICIN \$1.00-\$4.95
Drug Stores Only!

NEIGHBORLY NEWS

A CBC program aired every Sunday morning
At 10:00 Central Daylight Time

PREPARED BY C. F. GREENE

SEPTEMBER 22, 1957

Good morning, neighbors:

Whenever we see the word "WARNING" at the top of a notice in a weekly paper, we read it. The Kelvington Radio, Sask., publishes this one: WARNING—Privileges and Favors have been granted for many years with the free use of my home, phone, etc., but this privilege has been abused. NOW I find it necessary to lock my house up when I go out; and issue the following WARNING—"Anyone using or entering my house without my permission and the key will do so at their own risk. I am conducting an experiment and have a case of Dynamite and issue this warning in the friendliest of terms. This warning is also issued to the bears who have been carrying the sheaves off my farm into the bush. Take notice this is not a joke. Mr. Bruin found this out on Monday night when he returned to my grain field: its body now reposes in peace."—signed, Jens P. Johnson.

Not only reposing in peace but cut up into pieces is the bear mentioned in this news item in the Yorkton Enterprise, Sask. Corporal W. F. Isaac of the RCMP camping in a cottage at Madge Lake last weekend, heard a pounding on the cottage door which he opened to face a 400 pound black bear, who immediately took a couple of swipes at the holidaying policeman. Corporal Isaac evaded the blows, slammed the door and locked it. Then he went to the window of the cottage to find the bear already there looking in, attracted probably by the smell of food. The bear tried several times to gain entry to the cottage, then temporarily prowled away. Corporal Isaac later obtained a rifle from a forest ranger and when the bear came back again Corporal Isaac shot it. Barring mishaps at the cook stove, Bill should be now enjoying bear steaks.

The bear obviously made a mistake in coming back to the cottage—and Brimstone the Bull made a mistake—according to the Carillon News of Steinbach, Man., which reports that "Brimstone", a fire eating bull belonging to a well known Sprague district farmer found that he had gone just one step too far recently, when he attacked the farmer's wife. Brimstone is now up at St. Boniface on the inside of a well known brand of bologna sausage. The News goes on to state: If bulls are capable of repentance, it is probable that Brimstone repented many times between his last misbehaviour and the stockyard. His late owner, however, expresses the opinion that the ill-tempered brute will probably take revenge, if he has not already done so, by proving so tough that he breaks the sausage machine.

Still in the Animal kingdom, the Hamiota Echo, Man., tells us that the other day, the local postmaster called Dr. Hodge, the veterinarian, to inform him that the drug-gist's horse was up in the loft. On arrival at the scene, Dr. Hodge noticed a ladder up against the loft door. "Don't tell me the horse climbed that ladder!" he exclaimed. No, but the horse had gone up the stairs looking for its daily ration of hay. To get it down was the problem. Dr. Hodge put on the bridle, tied a blindfold over Cindy's eyes and tried to lead her down, then he tried to back her down—to no avail. Next the stair well was half filled with hay and a blinded horse plunged down. After the thud, an inspection revealed one very large eye and a bruised foreleg for Cindy, who incidentally is expecting in March.

"Very unexpected" was the appearance of certain blossoms in Alberta—according to the Westlock News which states: Mrs. Roy Hanlan of Picardville, says that her strawberries came into blossom only last week. There hasn't been a blossom or any fruit all summer. This may be in tune with the summer. Some say the atomic tests have something to do with the strange weather this summer.

For news of "Wild" Strawberries, we turn to the Oak Lake News, Man., which reports that Reeve Harry Hatch of Sifton Municipality found a patch of this wild fruit a week ago Friday, and he found another patch last Monday. Possibly this is a sign of a

long, open Fall, comments the News.

A Found article mixed up with Fruit is advertised in the Morden Times, Man., as follows: Found—"Big Ben" pocket watch under an apple tree. Owner may claim same by paying for the apples and this advertisement. For further information apply to The Times Office.

Speaking of food—we learn from the Elrose Review, Sask., that H. C. McDonald of the Wise-ton district, who has been wondering whether his female retriever will prove a good dog when the hunting season arrives, found out recently, that at least she possessed rare "retrieving" qualities—when she brought home a nicely dressed chicken wrapped in wax paper. Later, it was discovered that she had got the chicken on a back door-step in town, when the lady of the house had left it there for a few brief moments.

And for a few brief moments, a telephone call must have stumped a fireman—to judge from this news item in the Indian Head News, Sask. A man phoned the local fire hall last week and said: "Could you please warm up some Cream of Wheat for me?" A bewildered fireman responded with, "I'm sorry, this is the firehall, and we don't heat Cream of Wheat." The man behind the dial who we don't imagine wants his name published, apparently thought he was phoning a local cafe.

Well—anyone can make a mistake—but there is no mistaking the neighborly spirit behind this report in the Wolseley News, Sask. Last Friday afternoon, several good neighbors of the Mount Crescent and Allendale districts, operating 12 combines, drove into the fields of Mrs. Henry Moss and completed her harvesting work. Those responsible are to be highly commended for assisting one less fortunate than themselves.

"Well done, neighbors", would say these men and women who undoubtedly experienced a great deal of good neighborliness when they were pioneering in Canada. Entering the gay-ninety class are Joseph A. Russell of Barnsley, Man., 90—Mrs. A. Hill of Hilton, Man., 91—Mrs. Mary Michener of Red Deer, Alta., 91—Edward Heater of Donald, Alta., 91—Mrs. A. E. Wilson of Indian Head, Sask., 91—August Schlicht of Flatbush, Alta., 92—William Shields of Darlingford, Man., 94—James Sexsmith of Melfort, Sask., 98—and Mrs. Annie Buckle, formerly of Shellbrook, Sask., now living in Prince Albert, also 98.

Congratulations to you good neighbors—and congratulations also to Mr. and Mrs. R. J. Smith, formerly of Rapid City and Minnedosa, Man., now living in Vancouver, on the occasion of their 60th wedding anniversary.

These long-wedded married couples may get a smile out of this story going the rounds of our weekly papers. A parson had occasion to reprove a small boy for swearing. "Say, sonny," he said. "If your father was working in the garden and suddenly stepped back onto a rake which flew up and hit him from behind—what would he say?" Little boy: "You're back early, my dear."

No fish in Alberta; all in Saskatchewan!

"All day, all night, sifting sand", may have been alight for the popular calypso character "Mary Ann", but to Steve Rosko of Hanna, this business of sifting fish hooks and tackle is getting to be mighty monotonous. Steve, the venerable handy man around the Hanna Cleaners has tried every stream from the Saskatchewan border to the Rocky Mountains. An expectant trip to Banff over the weekend, yielded him exactly nothing in the line of fish. Carol side dam at one time brought a gleam in Stephen's eyes, but then again, no luck. Back in his home town of Hudson Bay, Sask., Steve claims, the fishing is all that can be asked for, but Alberta "she is simply no good." Steve has the tackle, and all he wants is some fish. Anyone in the Hanna district who can help this man, please do so immediately. He has lost patience with the Herald editor!—The Herald, Hanna, Alta.—August 8, 1957.

Speaking of youngsters, the Rapid City Reporter, Man., states that Ricky, son of Mr. and Mrs. Gavin Phillips, made an unusual find the other day. He uncovered an old American half dime, inscribed "United States of America", showing 13 stars and dated 1858. No use asking who lost it, but perhaps someone can tell Ricky what his find is worth—comments the reporter.

The hen who laid these eggs must be worth something to her owner. The Davidson Leader, Sask., reports that Mrs. Gintes, who is cooking for a crew of painters at a Grain Elevator there, was taking part in a discussion about good eggs. Everyone agreed that John Jones, Harry Smith and Pete Doe were good eggs. Then Mrs. Gintes told about the good eggs she met while cooking for a gang in Biggar, Sask. She said in the dozen eggs there were nine with double yolks which is quite a record in any cooking department.

"Go you one better than that," declares the Winkler Progress, Man. Three yolks in an egg, is that a record? If it isn't, are three eggs with three yolks in a few days a record? This is what Frank Suderman of the Chortitz district, who raises the phenomenal chickens who lay these eggs, wants to know. Mr. Suderman says that approximately 10 percent of his eggs have two yolks. He believes it is caused by a strong vitamin diet, but he doesn't know what.

Well, neighbors, during the past 12 years, we have seen many unusual photos in your weekly papers—but cannot recall such an oddity as one published in the Rimbey Record, Alta. Under a photo of a deer reclining on a chesterfield the news item reads: "The deer pictured above is a pet on the farm of Mr. Bob Hayward who farms about 10 miles west of Rimbey. The deer literally adopted the Hayward family about a year ago, and makes its headquarters in and around the Hayward home. As pictured, the deer is quite domestic, and likes to relax on a chesterfield in the Hayward parlor and listen to the radio."

We hope the deer is listening in to Neighborly News.

Good morning, neighbors, and keep smiling.

SERVICE DISRUPTED

Train service here was disrupted, by two derailments on the line. On Monday, a freight went off the track between Brandon and Belmont, with the result that livestock loaded in Bellevue on Monday by Mrs. Van Loo, did not get rolling until after dinner on Tuesday. Then on Friday the passenger train was derailed near Greenway, leaving no train service over the weekend.—The Recorder, Reston, Man.—Sept. 12/57.

Easy, easy sew PRINTED PATTERN Each One Yard 35"

by Anne Adams

Our new PRINTED Pattern—thrifty, easy-sew! Just ONE yard 35-inch fabric is all you need for each of these pretty serving aprons. Make them for yourself, bazaar best-sellers!

Superlative!

Imagine... golden crusted tender rolls made with tangy sour cream! Easy? Definitely, when the yeast is Fleischmann's Active Dry! If you bake at home, bake a pan of these distinctive dinner rolls.

Sour Cream Finger Rolls

1. Scald 1/2 pint (1 1/4 cups) commercial sour cream

Stir in 3 tablespoons granulated sugar, 1 teaspoon salt, 1 tablespoon butter or margarine. Cool to lukewarm.

2. Meantime, measure into large bowl 1/2 cup lukewarm water

Stir in 1 teaspoon granulated sugar

Sprinkle with contents of 1 envelope Fleischmann's Active Dry Yeast

Let stand 10 minutes, THEN stir well.

Stir 1/2 teaspoon baking soda into lukewarm sour cream mixture, then stir mixture into yeast. Stir in 1 1/2 cups once-sifted all-purpose flour

and beat until smooth and elastic. Work in an additional 1 1/2 cups (about) once-sifted all-purpose flour

3. Turn out on floured board and knead until smooth and elastic. Place in greased bowl. Grease top. Cover. Let rise in a warm place, free from draft, until doubled in bulk—about 3/4 hour.

4. Punch down dough. Turn out on lightly-floured board and knead until smooth. Divide dough into 3 equal portions; shape each portion into a 12-inch roll and cut into 12 equal pieces. Shape each piece of dough into a roll about 3 inches long. Arrange, about an inch apart, on greased cookie sheets. Grease tops. Cover. Let rise until doubled in bulk—about 40 minutes. Bake in a hot oven, 400°, about 14 minutes. Yield—3 dozen finger rolls.

SWALWELL NEWS

By Mrs. H. Lammle

The Swalwell Students Association election of officers resulted as follows:

President.....John Loewen
Vice-President.....Larry Luft
Secretary.....Carol Nesbitt
Treasurer.....Sharon Lammle

At their meeting of October 4th a motion was passed to ob-

measured in bushels
gasoline costs less

If a typical western wheat farmer could exchange bushels of wheat for gallons of gasoline—how many gallons would he get per bushel?

About 2 1/2 gallons? Well, that was true if you compared the average price of \$1 Northern wheat with the price of gasoline back in 1939. Over 5 gallons? You're right if you're thinking about prices in 1946.

Nearly 7 gallons? Correct. According to government figures for 1956, the year 'round average price that a western wheat farmer received for a bushel of wheat is sufficient to buy nearly 7 gallons of gasoline for his tractor.

On the score of performance, today's gasolines are an even bigger bargain. Modern refining techniques produce gasolines that are far superior to those sold only ten years ago.

IMPERIAL OIL LIMITED

tain student cards. Grades 7 to 11 are included in the Association.

Mrs. Grover Wacker has returned from her visit to Germany.

The United Church Annual Fowl Supper date is Wednesday November 6th.

Mrs. Mary Wacker is still a patient in the Three Hills hospital.

Mrs. Edna Jennings was a visitor to Swalwell to see her mother Mrs. Mary Wacker. Mrs. Jennings lives in California.

The activities will open with the traditional Indian pageant at 8 p.m. Friday October 11th.

During the pageant the homecoming princess will be revealed. The princess is selected by a vote of upperclass students on the basis of personality and contribution to campus life. The pageant will also feature several authentic Sioux Indian dances. Setting for the event erected in a natural amphitheater on the college campus.

BANK OF MONTREAL
WINS SOCRATES AWARD

Rating first among Canadian banks for its advertising during the past 12 months, the Bank of Montreal has again won the Socrates Award for the "best ad of the month" and earned the third highest score for North America in

DRUMHELLERROYAL WINTER FAIR
NOV. 14th to 23rd

Both the C.P.R. and C. N. R. are offering Package Tours to the Royal Winter Fair. The Tours offer low return fares, room while in Toronto and attractive side trips. Further information on these tours may be obtained at this office.

SOIL TESTING

Are you considering the use of fertilizer next year? Did you have patches in your fields this year that perhaps indicated a lack of soil nutrients? Recommendations as to proper practices and fertilizer may be obtained as the result of a Soil Analysis. Containers and instructions on taking a proper sample are available from this office. The charge for an Analysis is fifty cents and the fee must accompany the sample.

the "Bank Ad-views" survey of financial advertising covering the United States and Canada.

With the exception of one year, the B of M has had the top advertising rating for Canada for the past 12 years. In two years—1946 and 1954—it took first place on the continent.

In the latest issue of Bank Ad-views the announcement is made of the Socrates Award going to the B of M for an institutional piece published by the Bank in London, Ont.

CHRISTIAN SCIENCE

"Tre Sin, Disease and Death Real?" will be the subject of the Lesson-Sermon at Christian Science services this Sunday.

Readings from the King James Version of the Bible will include the following from Psalms (67:1, 2): God be merciful unto us, and bless us; and cause us to shine upon us; that thy way may be known upon earth, thy saving health among all nations.

From "Science and Health with Key to the Scriptures" by Mary Baker Eddy the following selections will also be read (206:26—28, 30): "Instead of God sending sickness and death, He destroys them, and brings to light immortality.... God does not cause man to sin, to be sick, or to die."

The Golden Text is from Proverbs (12:28): "In the way of righteousness is life; and in the pathway thereof there is no death."

SOCIAL SECURITY

State spending on social security and welfare now averages about \$400 per year per family in Canada. Of the total, about three-quarters is spent by the federal government, the remainder by the provincial and municipal governments combined.

BLOOD DONORS

Blood are now playing a new starring role in opening new worlds to a group of skilled surgeons and specialists performing miracle heart operations at University Hospital in Edmonton. Within the past few months 11 open-heart operations have been performed by this team of specialists and additional operations are scheduled at the rate of one each week to 10 days.

Such operations cannot be attempted without a large quantity of blood available in the operating room. The Red Cross with its army of volunteer donors is providing this blood. An average of 18 to 20 donors, sometimes more, is needed for each operation and as only fresh blood can be used donors are required to be at the Red Cross blood donor clinic in the early hours of the morning the day of the operation.

It is rarely possible for families of these heart patients to supply the large number of donors with correct blood types required in these operations. Relatives and friends of these patients are therefore asked to attend Red Cross blood donor clinics in their districts and give blood which will be needed to save the life of some

He is saving so he and his wife
can take an extended motor trip

**Both have a
bank account—and
a purpose for saving**

The difference between reaching a goal and missing it can be the savings you put by, now, in a bank account.

Such savings don't just happen. They involve some sacrifice, definite planning. But as your dollars mount up you feel a sense of accomplishment, of getting somewhere, that makes the effort more than worth while.

Your bank account provides ready cash that can help take care of any emergency that may arise, or open the way to bargains or other opportunities. Whatever objective you may have in mind, and whatever use your savings may ultimately serve, you'll always be glad you saved.

Save at a bank — millions do!
